

SWEETLY HONEY FRUITY TOUCH™

Game Type: Touch Game

Return to Player: 96.71%

Sweetly Honey Fruity Touch™ is a highly energetic video slot with 5-reels and 15-bet lines (fixed) featuring Wild substitutions with x2 multiplier and a Free Spins multiplier of x2.

The exotic fruit symbols and traditional music blend in perfectly with the colorful Asian theme of the game. The vibrant graphics and symbol animations are perfectly suited to give players a fruity experience.

GAME DESIGN

Wild symbol

Wild symbol win

Wild Substitution

In the main game and Free Spins, Wild symbols appear on reels 2, 3, and 4. Wild symbol substitutes for all the symbols.

All bet line wins with a Wild symbol pay double. Only one Wild multiplier is applied per bet line win.

Free Spins activation

Free Spins

Free Spin total win

Free Spins

A bet line win with matching fruit symbols awards Free Spins. During Free Spins, any winning combinations with matching fruit symbols award extra Free Spins according to the Paytable.

All bet line wins in Free Spins pay double. In Free Spins, bet line wins with Wilds pay Wild multiplier x Free Spins multiplier.

At the end of Free Spins, the total win from Free Spins is added to any wins from the round that activated Free Spins.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
