Game Theme & Graphics

Pigs are the theme of this 5-reel, 15-line video slot. Rich pigs to be exact. This classic slot is a game for those who love the trappings that big wins can buy; Piggy Riches Touch™ is oozing with over-full purses, high limit credit cards, gold and furs.

Main Game

Players can select the coin value and bet level before starting the game round. Tapping the Spin button starts the game round and this Spin button also contains one of the many new features.

The player can tap the plus sign on the Spin button to access the Quick settings menu which contains Quick Spin and Autoplay.

Other brilliant new features in Piggy Riches Touch™ are the support of portrait mode and left hand mode.

Wild Substitution

Wild symbols can appear in any or all reels and substitute for all symbols except Scatter symbols to complete winning bet lines. Winning bet lines using Wild symbols will multiply the coin win by 3.

When a Wild symbol completes a winning combination the player sees one of the rich pigs throwing money up in the air, drawing even more attention to the win.

Scatter symbol

Winning Scatter symbols with a Free Spin/multiplier combination

Free Spins win presentation

Scatters and Free Spins

The main game pays out on 2 or more Scatters. These wins pay the multiplier displayed in the paytable multiplied by the total bet.

Piggy Riches Touch™ features interactive Scatter symbols. When 3 or more Scatter symbols appear, the Scatter symbols change to reveal Free Spin and multiplier combinations. Each winning Scatter symbol shows a different Free Spin/multiplier combination for the player to choose from. See Payout section for details.

The Free Spins are played at the same bet level and with the same number of bet lines and coin value as the game that triggered the Free Spins.

During Free Spins each additional Scatter gives one extra Free Spin.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
