

SPINSANE TOUCH™ (OPENBET)

Game Type: Touch Game (OpenBet)

Return to Player: 96.26%

Spinsane Touch™, the latest offering from NetEnt™, is a 5-reel, 3-row, 27-line video slot based on classic stepper mechanics. The look and feel of the game brings the ultimate slot machine experience, boosted with suspense effects randomly activated to add excitement to the game.

Wild symbols, Scatter symbols, regular symbols, super symbols, and blank spaces can appear on the reels. For each winning bet line, super symbols can substitute for the regular symbols of the same kind to pay the highest possible winning combination.

The game features Free Spins with one random Overlay Wild Reel for each spin.

Game Sheet Version: 0.0

GAME DESIGN

Free Spins activation

Free Spins & Overlay Wild Reel

Free Spins & Overlay Wild Reel

5 or more Scatter symbols appearing anywhere on the reels in the main game activate Free Spins. The amount of Free Spins activated is twice the amount of Scatter symbols that activated the Free Spins. Each Scatter symbol awards two Free Spins. During Free Spins, each Scatter symbol appearing anywhere on the reels awards one additional Free Spin. In Free Spins, one random reel of reels 2-5 becomes an Overlay Wild Reel for each spin.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
