Game ID	trollpot_mobile_html (basic wallet) trollpot_mobile_html_sw (seamless wallet)
Compatible Operating Systems	iOS Android
Display Resolution	960 x 540
Aspect Ratio	16:9
Technology	HTML5
Deployment	Refer to CasinoModule Help for information about launching CasinoModule games.

GAME DESIGN

Nudge Feature

Up Arrow

Multiplier Wilds

Nudge

Every time there is a winning combination on the reels, the Nudge feature is activated. The reel will nudge until the symbol above the winning one is different. This pattern is then repeated for the second reel and eventually the third reel.

When a reel stops nudging, there might be an up arrow symbol at the top of the reel. In this case, the reel will be moved to the bottom of the current stack of winning symbols. The reels will then start nudging and paying from this position as described above.

Multiplier Wild

Multiplier Wild symbols can appear anywhere on reels 1-3 and substitute for all symbols, except for up arrow symbol and Jackpot symbols.
One Multiplier Wild on the winning bet line multiplies the win by 2, two Multiplier Wilds multiply the win by 4 and three Multiplier Wilds multiply the win by 8.

Jackpot

Jackpots

The game offers three fixed Jackpots, Mini, Midi, and Mega. When all the reels stop nudging, there may be Jackpot symbols present at the top of the reels. If each reel has a Jackpot symbol on the top of a winning stack, the player is awarded the lowest paying Jackpot.

For example: 3 Mega Jackpot symbols will pay out the Mega Jackpot; 2 Mega Jackpot symbols and 1 Midi Jackpot Symbol will award the Midi Jackpot; and 1 Mega Jackpot symbol, 1 Midi Jackpot symbol and 1 Mini Jackpot symbol will award the Mini Jackpot.

PAYOUT

Payout Summary

GAME RETURN TO PLAYER (RTP)

- Total RTP: 96.19%
- Line wins RTP: 86.97%
- Mini jackpot RTP: 4.69%

ADDITIONAL INFORMATION

## Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.
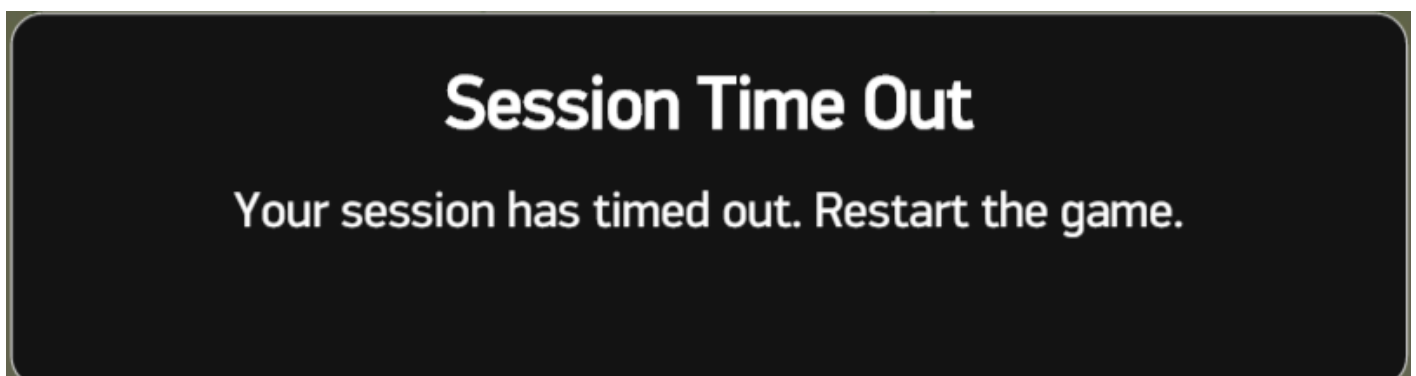

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at http://www.netent.com/games/
