Stacked Lady and Dracula symbols

Main Game

## Game Theme & Graphics

The main game features a darkly brooding Dracula at the side of the reels. As well as the fantastic features associated with NetEnt™ games, Dracula Touch! has spine-chilling sounds and dramatic animations adding to the excitement of the game.

The main feature of the game is the Bat feature; when this hair-raising feature is activated, bats take flight over the reels. When the bat cluster lands, it transforms the symbols into the same randomly activated symbol.

## Main Game

Players can select the coin value and bet level before spinning the reels.

- **Game actions.** The buttons on the key pad perform the following different game actions:

BET LEVEL	Dragging or tapping the slider increases and decreases the bet level (i.e. number of coins per bet line) by 1.
	Tapping the Spin button starts a game round at the current bet level and coin value.
COIN VALUE	Dragging or tapping the slider increases and decreases the coin value to the next level.
AUTOPLAY	Tapping the Autoplay button starts a game round automatically. Sets 50 rounds by default.
	Tapping the plus sign on the Quick Settings Menu button, opens the quick settings menu. Player can choose to quick spin or start autoplay without going to the settings menu.

Free Spins

## Bat Feature

In the main game, the Bat feature is randomly activated and may be activated once per spin only.

In the main game, Free Spins cannot be won if the Bat Feature is activated.

When the Bat feature has been activated, bats will fly in and land anywhere on the spinning reels in a cluster formation.

All bats in the cluster turn into the same random symbol, including the Wild symbol.

## Wild Substitution & Stacked Wild

Wild symbols substitute for the highest possible winning combination on a bet line.

Stacked Wild symbols can appear randomly anywhere on reel 3 in Free Spins only and substitute for the highest possible winning combination on a bet line.

## Free Spins

10 Free Spins are activated when both the stacked Dracula symbol appears on reel 2 and the stacked Lady symbol appears on reel 4 in the main game.

In Free Spins, the bats swoop dramatically onto the reels on every single spin, adding to anticipation for players as they wait to see how many bats will fly onto the reels and transform symbols.

If 20 Bats swoop onto the reels, all the reels are filled with bats!

In Free Spins, the Bat feature is activated once per spin only.

2 Additional Free Spins can be won when the Stacked Wild symbol appears on reel 3 during Free Spins.

### Randomisation

#### RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

#### ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

### Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

### Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
