

FRUIT SHOP™ MEGAWAYS™ TOUCH OPENBET

Game Type: Touch Game (OpenBet)

Return to Player: 96.06%

NetEnt™ presents: Fruit Shop™ Megaways™ Touch, a 6-reel Megaways™ video slot featuring Wild substitutions and in-game Free Spins with an increasing Multiplier!

Players will enjoy the simple, cheerful design of this classic fruit slot and frequent in-game Free Spins activated by a win on any of the Fruit symbols. Additional Free Spins can be won during Free Spins, and a progressive Multiplier reaching up to x10 increases Free Spins wins.

The Megaways™ payout mechanics add an extra twist to the game experience: the number of symbols on the reels is randomly chosen each spin, resulting in the varying number of Megaways™, reaching up to 117649 Megaways™!

Deployment	Refer to CasinoModule Help for information about launching CasinoModule games.

GAME DESIGN

A Megaways™ win

Megaways™

Each spin, between 2 and 7 symbols land on each reel. The number of Megaways™ for the spin is equal to the number of symbols on each of the reels multiplied. The maximum number of Megaways™ is 117649.

Matching symbols in any position on at least three adjacent reels starting from the leftmost reel create a Megaways™ win. More wins are awarded when additional matching symbols appear on the reels that create the longest Megaways™ win.

Wild symbol

Wild Symbol

The game features Wild substitutions. Wild symbols can appear on reels 2, 3, 4 and 5 in the main game and during Free Spins and substitute for all symbols.

Free Spins activation

Free Spins

A Megaways™ win on any of the Fruit symbols awards between 1 and 5 Free Spins. During Free Spins, additional Free Spins can be activated by a Megaways™ win on any symbol.

The number of Free Spins depends on the type of symbol and the length of the winning combination. If there are simultaneous wins on more than one symbol, the Free Spins won per symbol are added together.

Free Spins

Increasing Multiplier

During Free Spins, there is an increasing Multiplier applied to the wins. The initial Multiplier value is x1 and it increases by 1 after every winning spin. The maximum Multiplier value is x10.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

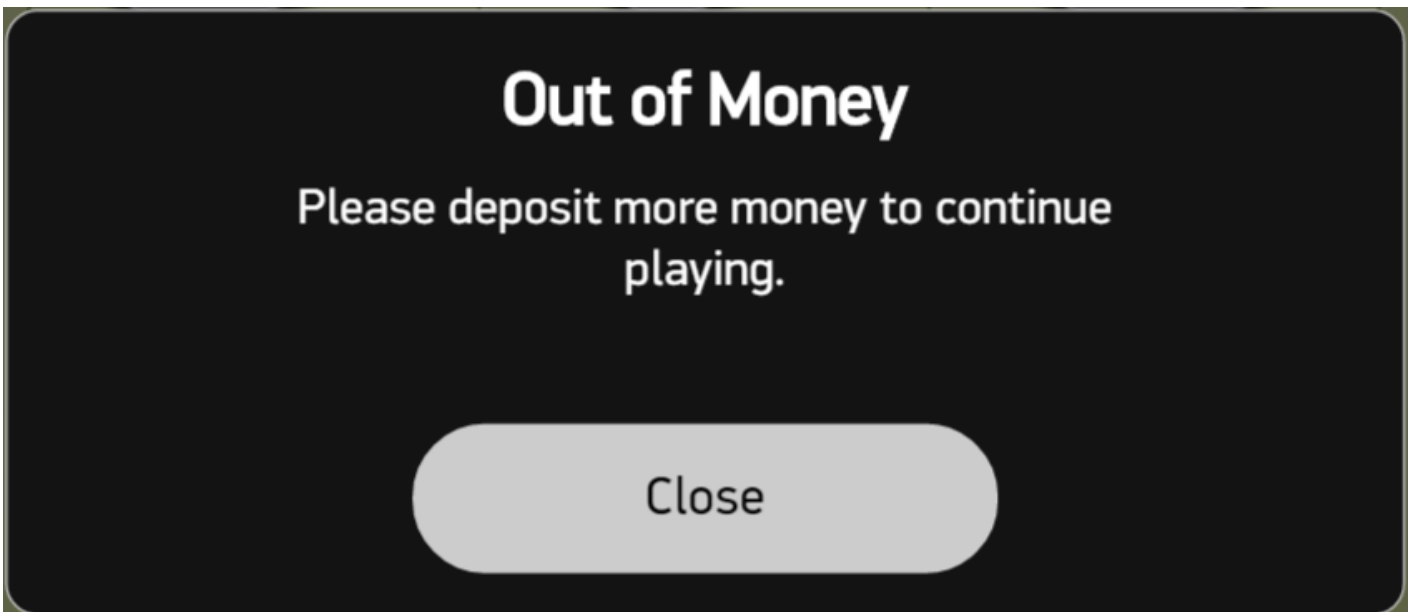

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
