Game Theme and Graphics

Mythic Maiden Touch™ has all the visual appeal characteristic of Net Entertainment's games. This latest mobile game video slot takes place in a lost attic filled with the relics and oddities of an experienced traveller. But not all the items are what they seem to be...

This curious setting combined with rich graphics, captivating effects and creepy animations is sure to capture the attention of video slot players of all ages and backgrounds.

- **Iron Maiden.** Beside the antique mirror, in which the reels spin, sits an iron maiden, haunted by the souls of victims from long ago.
- **Reel Spin.** Reel spin animation that provides additional excitement, heightened suspense and win anticipation.

Big Win presentation

Main Game

- **Wild substitutions.** Wild symbols appear on reels 1, 3 and 4.
- **Big Win Presentation.** All high wins in the game are followed by a special Big Win presentation.
- **Quick Spin.** The length of game rounds can be shortened by checking this option in the Spin Settings option.

Wild symbol

Wild Substitution

When the Wild symbols hit, players will definitely notice. Wins with Wild are emphasised by an eerie animation of a skull appearing over a full moon.

- **Wild symbols** substitute for all symbols except Scatter symbols.
- **Bet line wins** with a Wild are tripled.
- **In Free Spins,** Wild multipliers and Maiden multipliers are added.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that “In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded.”

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
