Deployment	Refer to CasinoModule Help for information about launching CasinoModule games.

## GAME DESIGN

Colossal symbols

### Colossal Symbols

Any symbol can appear on the reels as a single symbol, 2x3 or 3x3 Colossal symbol. Colossal symbols can land on the reels fully or partially.

Strolling Staxx Re-Spins with connected symbols

### Strolling Staxx Re-Spins

Strolling Staxx Re-Spins are activated if one or more reel is covered with the same symbol, creating a stack of symbols. During the Strolling Staxx Re-Spins all stacks of symbols and connected symbols move one reel to the left on each spin until all stacks disappear from the leftmost reel. A symbol is connected to the stack if it is the same symbol as the stack and is adjacent to a stack or lands on a reel adjacent to another connected symbol. If during the Strolling Staxx Re-Spins more stacks of symbols appear on the reels, Strolling Staxx Re-Spins are re-activated.

Extra Chance with Bonus Bet activated

### Bonus Bet & Extra Chance

If Bonus Bet is activated, the game is played with 15 coins per bet level.

The Extra Chance can be activated while playing with Bonus Bet, when Strolling Staxx Re-Spins are activated, but not with a 3x3 Colossal symbol. During the Extra Chance, overlay 3x3 Colossal symbols can fully or partially land on the reels.

Extra Chance feature

## PAYOUT

### Payout Summary

#### GAME RETURN TO PLAYER (RTP)

- Without Bonus Bet:
- Total: 95.98%
- Main game: 27.3%

## ADDITIONAL INFORMATION

### Randomisation

#### Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

### Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

### Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

### Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
