

BACCARAT TOUCH

Game Type: Table Game

Return to Player: 98.94%

Baccarat Touch is a card game played between the Player and the Banker. The game has a state of the art card animation. The game is played with 8 decks of 52-cards (excluding Jokers), which are shuffled together before each round. Baccarat Touch game follows the standard game rules of classic Baccarat game, with a 9 for 1 payout for a tie. Players can place a single bet or a combination of bets on the table.

The user-friendly touch interface gives a richer game experience.

GAME DESIGN

Game Table

Game Theme and Graphics

Baccarat Touch is a feature-rich graphics table game with game play settings that can be adjusted by the player.

The player can activate high quality background music track that has been tailor-made for this game.

Other features include:

- Fun game play, that allows the player to play a few trial hands before placing real money bets.
- A Baccarat history table that displays the results of previous game rounds.
- Fully adjustable sound settings.
- Adjustable card deal speed.

Placing bets

Placing Bets

Placing a bet is easy! The player selects a chip, and then taps on the sections marked as TIE, BANKER or PLAYER on the table to place a bet. Repeated taps increase the amount of the bet; the coins stack up on the table and the total value displayed beneath the coin increases.

Game play

Game Play

When the player taps to deal, cards are dealt to both the Player and the Banker. The outcome of the game appears alongside the bets. Before the next game round starts, the player is given a chance to Rebet (place same chips in the same table sections), double the bet placed in the previous game round or place a new bet.

History of game rounds

Baccarat History

The player can choose to display the game round history from the PLAY SETTINGS. The history is formatted as following:

- The most recent game round appears in the top two squares.
- The number on the left indicates the card value for the Player; the number on the right indicates the card value for the Banker.
- If the player wins a game round, the Player's hand value is highlighted in green and the Banker's hand value is highlighted in grey. If the Banker wins a game round, the Banker's hand value is highlighted in green and the Player's hand value in grey. If the result is a Tie, both Player and Banker hand values are highlighted in grey.

Rebet

Rebet

During the game round, a player can place the same bet as the previous round by tapping the Rebet button.

Rebet X2

Rebet X2

During the game round, a player can double the value of the previous bet placed in the game round with rebet X2 button.

New Bet

New Bet

To place a new bet, player must clear the bets on the table and place the chips and tap the deal button.

PAYOUT

Payout Summary

GAME RETURN TO PLAYER (RTP)

98.94%

MAXIMUM WIN (€)

Default: 9000.0

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
