Video slot elements

Game Theme & Graphics

Mega Fortune™ comprises three main elements - video display area, keypad area, and game panel.

- **Video display area.** The main game and Bonus Game are played in this upper area. In addition, the payable button is displayed in this area.
- **Keypad.** The keypad shows the current bet level (i.e. number of coins wagered per bet line), the current number of bet lines, the available cash in coins, and the current coin value. This area also contains the main game buttons used to select the bet level, bet lines, coin value, and start the game.
- **Game panel.** The game panel at the bottom houses the buttons for the game settings menu, audio, game rules, and autoplay. This area also displays the player's account information and alternates between showing the available cash, current bet, amount won, and player mode (when in Play for Fun mode).

Game screen, showing all bet lines

Main Game

Players can select the coin value, number of bet lines and bet level before spinning the reels.

- **Game Actions.** The buttons on the key pad perform the different game actions:

	Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider below.
	Clicking the Spin button starts a game round at the current bet level.
	Clicking this button changes the bet level to 4, and starts a game round with all 25 bet lines selected.
	Clicking the left and right arrows increases and decreases the coin value. To increase or decrease faster, the player can click and drag the slider below.
	Clicking AUTOPLAY automatically plays the game for the selected number of rounds.

Wild symbol

Wild Substitution

Wild symbols are animated: The speedboat jets off into the distance, jumping waves and leaving sea spray in its wake.

- **Substitution.** Wilds substitute for any other symbol (except Scatter and Bonus symbols) to complete winning bet lines.
- **Win value.** When Wild symbols appear on a winning bet line, making a valid substitution, they multiply the win by 5.

Scatter symbol

Scatters and Free Spins

Mega Fortune™ features Scatter wins and clickable Scatter symbols that reveal the win multiplier and number of Free Spins awarded.

- **Scatter wins.** The game pays out on 3 or more Scatters.
- **Free Spins feature.** The Free Spins feature is activated when players get 3 or more Champagne Scatter symbols. “Select a Scatter” text prompts players to click one of the symbols, and the number of Free Spins and Free Spins win-multiplier to be awarded is displayed; for example, 8 Free Spins, 1x multiplier.
- **Free Spins mode.** Players click the Start Free Spins button to enter Free Spins mode. Free Spins are played with the same bet level and number of lines as the game that triggered the Free Spins. A dynamic sign informs players on the remaining Free Spins, and the current multiplier applied to Free Spin wins. This is updated each time the Free Spins feature is triggered and new Free Spins or multiplier are won.
- **Free Spin wins.** All wins pay the win multiplied by the win multiplier (1-5) displayed in the game. This excludes Bonus Game wins and additional Free Spins. At the end of Free Spins, the total winnings are added to the player’s cash.
- **Free Spins trigger.** 2 or more Scatters during a Free Spins round activate additional Free Spins or multiplier. Players click a Scatter symbol to reveal the number of additional Free Spins or multiplier. Additional Free Spins or multipliers are added to the current Free Spins or multiplier (up to a maximum of 5x multiplier).

Clickable Scatters award number of Free Spins and Multiplier

Jackpot Bonus Game

The Bonus Game features 3 wheels, and 3 progressive Jackpots. The 2 smaller local Jackpots give an excellent incentive to play, but the third global Jackpot is something quite special: a payout of four million euros (expected value)!

The aim of the Bonus Game is to stop the wheel spin so that the pointer rests on an arrow. Arrows progress the player onto even greater Jackpot win chances. In this Bonus Game, the player can win either a Jackpot or a fixed coin value.

- **Bonus game trigger.** 3 Bonus symbols on an activated bet line

Bonus Game

start the Bonus Game. **Note:** Only one Bonus Game is awarded per spin. Wilds do not substitute for Bonus symbols.

- **Bonus game start.** When the player enters the Bonus Game, the outer wheel is already spinning. Players are instructed to click STOP to stop the wheel. Alternatively, players can wait for the auto stop countdown.
- **Bonus game finish.** The Bonus Game ends when either a coin value or Jackpot has been won. A win presentation screen shows the value of the win. The player must click BACK TO GAME to continue playing the main game.

Paytable page 1

Paytable

Main slot winnings are paid out depending on the symbols displayed on a bet line when the reels come to a stop. For a combination of regular symbols to be a winning combination, at least 1 of the symbols must be displayed on the first slot reel, and the remaining symbols must be next to each other on the enabled bet line. The in-slot paytable displays the payout for each winning combination.

Mega Fortune™ features a 2 page paytable. Players click the Information button to display the first page which shows the payout and payout rules for the Wild, Scatter and Bonus symbols. The second page, accessible by clicking the right arrow displays the number of coins won for each winning symbol combination in the main game, as well as a graphical display of the bet lines and the general payout rules. To return to the game, players click the return to game arrow.

PAYOUT RULES IN MAIN GAME

- Bet line wins are multiplied by the number of coins bet per bet line.
- Wild symbol substitutes for all symbols except Scatters and Bonus wins.
- Scatter wins pay total bet x multiplier.

PAYOUT RULES IN FREE SPINS

- Number of Free Spins won and Free Spins win multiplier vary depending on the Scatter selected by the player when entering Free Spins.
- Multipliers are added together to a maximum value of 5.

Randomisation

RANDOM NUMBER GENERATOR (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

ALGORITHM FOR A RANDOM REEL POSITION

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

(Italy jurisdiction only) Further information on management of malfunctions is also described in section 3.2.1 of the Gaming Platform (Progetto Della Piattaforma Di Gioco) document. This document provides details on how a player is informed of balance return payments and the technical process.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.

Game Simulation

A demo version of the game is available at <http://www.netent.com/games/>
